

Bitmap graphics and Vector graphics

Task 2 – Create a Logo

Objectives:

- To understand the differences between vector graphics and bitmap graphics
- To understand the situations in which vector graphics and bitmap graphics are used

Task

In this task you will use Inkscape to create a logo for a company or business. You can think of your own idea or you can base it on one of the famous logos below.

Whichever logo you choose, remember the golden rule: break the task down into smaller parts. Trying to draw the entire logo as one shape is a Bad Idea.
