Recommendations for future development

Andrew Murgatroyd believes that the website has one primary improvement, and it will be done in the future. The improvement involves setting up an online shop where people can buy El Salvador Cricket merchandise and have the products shipped in the case that the person buys it from abroad. However, in order for this to happen the El Salvador Cricket organization must first organize the merchandise that is being produced at the moment and the merchandise that will be produced in the near future. The reason the shop is an important factor is because it could be one of our primary sources of funds, it may not be much, but it gives the organization more room to grow. Besides, if people buy El Salvador Cricket merchandise then more people will be encouraged to do the same; given that Cricket will become more recognized around the country.
